Double Wall Stainless Steel Bottles with Carry Handle

Double Wall Stainless Steel Bottles

Double Wall Bottles with easy-to-carry wide loop handles and trendy Matt finish colors, Vacuum insulated feature that keeps beverage temperature much longer, and spout lid that secures your drink from spilling. Due to their multiple benefits and advantages over typical single-wall bottles, double-wall stainless steel bottles have grown in popularity in recent years. These novel bottles are intended to maintain beverages at the right temperature for extended periods of time, making them suitable for both hot and cold beverages. The strong insulating capabilities of double-wall stainless steel bottles are one of their main advantages. The double wall construction produces a vacuum-sealed chamber between the inner and outside walls, acting as a barrier against temperature changes from the outside. This insulation aids in the preservation of the contents of the bottle, keeping hot beverages hot and cold beverages cold for extended periods of time. Whether you're sipping a hot cup of coffee on a chilly morning or a refreshing iced tea on a hot summer day, these bottles keep your drink at the temperature you want. Furthermore, double-wall stainless steel bottles are extremely sturdy and long-lasting. The stainless steel material is known for its strength and corrosion resistance, making it a dependable choice for regular usage. The double wall construction provides an additional layer of protection, lowering the chance of dents and damage. Because of their resilience, they are ideal for a variety of activities such as hiking, camping, and sports, where a tough and long-lasting bottle is required. Another key benefit of double-walled stainless steel bottles is their environmental friendliness. With rising concerns about plastic pollution, these bottles offer a more environmentally friendly alternative to single-use plastic bottles. Individuals can lower their carbon footprint and contribute to a cleaner environment by utilizing reusable stainless steel containers.

- Material: Stainless Steel
- Capacity: 1.15 Ltrs. 38 oz
- Double-wall SS insulating
- Twist-off lid and carry handle
- Size : 95 x 95 x 300 mm
- Item Weight: 0.353 kg
- Pcs in Carton Box: 25
- Carton Weight: 12.5 kg
- Carton Box Size: 51x51x32 cm
