Wireless Powerbank Portfolio with USB & Light up Logo

Wireless Powerbank Portfolio with USB & Light up Logo

The Wireless Powerbank Portfolio is a versatile and creative device that combines power bank capability with portfolio convenience. It provides a beautiful and practical alternative for professionals on trips, thanks to its slim A5 size, black color, and premium features such as a light-up logo and additional storage. One of the portfolio's notable features is its built-in 8000 mAh wireless power bank. This strong and dependable power bank allows users to wirelessly charge their Qi-compatible devices, removing the need for tangled cords and giving a smooth charging experience. Users can charge their smartphone, tablet, or other compatible device by just placing it on the portfolio's surface. The portfolio's A5 size makes it compact and easy to transport, fitting comfortably in briefcases, backpacks, or handbags. Its dark color lends a hint of class and professionalism, making it appropriate for a variety of corporate settings. The portfolio's light-up logo feature offers a unique and eye-catching aspect. When the portfolio is opened or used, the logo illuminates, visually highlighting the company and leaving a lasting impression. This customization option allows businesses to prominently show their logo and increase brand visibility. Aside from the wireless power bank and the light-up logo, the portfolio also features a handy 32GB USB storage option. This enables users to effortlessly save and transmit files, documents, and presentations, making it a useful tool for professionals that require mobile access to their digital data.
