Digital Luggage Scale

Luggage Scale

With our Mini Digital Luggage Scales, you may avoid paying for extra luggage at check-in. It is the ideal size to bring on your trip so you can weigh your luggage before the return trip because it is lightweight and simple to use. Digital luggage scales that are advertised are excellent giveaways. Because paying overweight fees can get expensive and because regulations are getting stricter all over the world, it's better to be safe than sorry and weigh your luggage before heading to the airport. With the aid of a promotional luggage weight scale, you won't ever have to face any issues regarding luggage weight before your important flight. It can also be employed if you recently went on a trip and acquired lots of souvenirs that you want to bring home with you.

Since a custom weight scale is portable and lightweight, you may use it anywhere you like and potentially save money over time. This luggage weight scale can accurately weigh up to 40 kg of luggage, which also confirms the high caliber of its construction. To advertise your business internationally, have your company logo screen printed right away.

• Product Dimensions: 3 x 10 x 2.5 cm
