Aluminum Card Size USB

Promotional Card Size USB

Metal Card Size Your data is safeguarded from outside magnetic fields by a USB storage device that is compact, portable, and practical. More data can be stored on a metal business card USB drive than on other disks, and it requires less power to start. The main advantage of this metal card USB is that it is simple to connect to any low-power-consuming device because it uses less power.

Additionally, it works best when connected to battery-powered devices. Furthermore, the power source does not pose a memory loss risk. The storage capacity of this metal business card USB drive comes in various sizes. The maximum size is 32GB. This Aluminum Card Size USB is of the highest quality and is precise for all data backups. This USB card offers enough space for you to add the logo of your business or brand to make it uniquely yours. For promotional events, you can add a logo on your card USB utilizing printing technologies like full-color UV printing and screen printing to increase its appeal to your company's clients.
