Teflon Sheet for heattransfer  
Specifications: Size: 405 x 500 mm

TS-CH-M  
Teflon Sheet for heattransfer  
Specifications: Size: 500 x 500 mm

## Teflon Sheets for Heat Press

100% Non-Stick Teflon ironing sheet lets you work in peace ? no mess from hot glue, ink, or paint. use a heat press for heat transfer vinyl, dye sublimation, transfers, etc. You need a protective layer to keep the vinyl from sticking to the heat plate. These work great for that. Heavy Duty Thickness withstands up to 600-degree temperatures, and Teflon sheets will absorb some heat. With many applications, you need a fairly consistent temperature, especially dye sublimation. Easy Clean-Up ? Sheets are Teflon Coated PTFE fiberglass so nothing sticks to it! Just wipe it clean. Multi-Purpose Craft Item: PTFE sheet can serve as a barbecue grill mat, nonstick oven liners, iron clothes protectors, heat press transfers, paints, and other crafting projects. The Same Teflon that We Use to Heat Press Our Apparel Line. **Available sizes: Big:** 40 x 50 cm | **Medium:** 40 x 40 cm | **Small:** 28 x 40 cm
