Gift Packaging Box for Better Presentation Size: L

This Large **Gift Packaging Box** (255 x 45 x 255 mm) combines eco-friendly materials like **RPET**, **Cork**, and **Hardboard** for a stylish and sustainable presentation. The box is durable, lightweight, and offers premium gift protection, making it perfect for special occasions. Its natural cork finish adds a rustic, elegant touch, while the hardboard ensures rigidity and durability. Ideal for medium-sized, flat, or elongated gifts.

1. RPET (Recycled PET)

- **Material:** RPET is made from recycled polyethylene terephthalate (PET) commonly found in plastic bottles and containers.
- **Eco-friendly:** Using RPET helps reduce waste and supports sustainability by giving new life to plastic that would otherwise end up in landfills.
- **Durability:** RPET is strong, lightweight, and resistant to wear and tear, making it an excellent choice for packaging that needs to withstand handling.

2. Cork

- **Natural and Sustainable:** Cork is a renewable material sourced from the bark of cork oak trees, which naturally regenerate. It is biodegradable and provides a premium, natural look.
- **Unique Texture:** The natural texture and appearance of the cork add a rustic, earthy feel to the packaging, which can elevate the presentation of the gift.
- **Lightweight:** Cork is relatively lightweight, adding minimal weight to the packaging, which is ideal for shipping or transporting gifts.

3. Hardboard

- **Strength and Protection:** Hardboard, made from compressed wood fibers, provides a strong structure. It reinforces the box's base or sides, maintaining its shape and protecting the contents.
- **Smooth Finish:** It can be coated or finished to have a smooth surface, making it suitable for printing or decoration.

Benefits of the Gift Packaging Box

- **Eco-Friendly:** The box is an environmentally conscious packaging option made from sustainable materials like RPET and cork.
- **Stylish and Attractive:** The combination of modern and natural materials like RPET and cork can create an elegant and unique presentation.
- **Protective:** The hardboard protects your gifts during transport or handling.
- **Premium Feel:** The materials used, especially cork, give the packaging a high-end, crafted feel, making it ideal for special occasions like birthdays, weddings, or corporate gifts.

This packaging offers a stylish, sustainable, and protective way to present a gift.
