Power Bank Plus

Power Bank Plus

An attractive, lightweight, and portable thin battery charger. With a power capacity of 4600 mAh, this battery is a promotional mobile charger with the fastest charging speed. This brand-new portable power bank has a 50x30 mm light injection display and a lithium polymer cell battery. Each head includes two ports, one for charging the primary device and the other for charging the secondary device. This personalized power bank contains an on/off switch and a high-capacity power indication. Because the front of your Ultra Slim Power Bank is printable, you may add your company's logo to boost its appeal. When a gadget is charging or being recharged, the logo illuminates. This rechargeable battery comes in two colors?white and black?and has a fully colorful logo. Although plastic packaging is an alternative for your product, it makes it look elegant.
