Round Crystals Awards

Round Crystal Awards

Sunflower crystals with beveled edge adorned round crystals. They were made of transparent crystals with a glossy finish. As a result, they are sleek and uncomplicated. They are also dependable and durable. The dimensions of this round crystal are 15 x 16.5 mm. Its edges are beveled at various angles. They can be altered. As a result, individuals mainly save these stones as awards. Additionally, they are quite affordable as tiny engraved awards for almost any occasion. The crystal is glitzy because of its lower-grade high-grade foundation. You may thus utilize these crystals to create unique crystals.

Engraving allows you to personalize these printed spherical crystals. This crystal's design was incredibly ornate while still being beautiful and exquisite. They can also be used as decorative items. There is a laser engraving option available. As a result, you can alter them by adding different text. These personalized crystals are particularly fantastic for professional gatherings. They can be personalized with your logo and used for business events. They make good business presents for your loved ones.
