GRAPHTEC Cutting Plotter CE7000-60

VCP-004
Graphtec CE7000-60 Cutting Plotter
Specifications: maximum cutting area: 54" x 84"

Vinyl Cutter Plotter with Stand by GRAPHTEC

Currently, the GRAPHTEC Vinyl Cutter Plotter Series comes in widths of 24". Simply put, it is one of the most affordable cutting plotters available for, among other areas, garment decorating, sign graphics, PRINT AND CUT graphics, and automotive industries. A registration mark sensor for print and cut operations, perforation cutting capability, and assured cut accuracy of over 15 feet are just a few of the outstanding features available with the CE7000 series, which is available at a very affordable and cost-effective pricing point. Fast & Accurate Digital Servo Motor 4 Point, Dual-Axis Skew Correction with Auto Registration Mark Sensor Tangential control increases accuracy

Possible Applications

- Stickers/decals
- Window signage
- Heat transfer apparel
- Window tint film
- Paint protection film

Moreover Updated Features

BARCODE SYSTEM NEW DATALINK By processing many jobs automatically at the touch of a button utilizing barcodes, you may save time and lower the possibility of production errors.

NEW THROUGH CUT CHANNEL PER MODEL

Your blades and cutting strips will last longer thanks to separate tool positions for contour and die-cutting. So the designs and decals on the sheet and roll media simply popped out. Easily permit through-cut or perforated-cut operations.

NEW USB THUMB DRIVE SUPPORT FOR OFFLINE CUTTING

A new secondary USB port is added for placing thumb drives for upload and cutting without the need for a computer. Select the barcode function or select the file directly from the thumb drive.
