2025 Table Calendars with Plantable Seeds

SPS-09
Table 2025 Calendar with Plantable Seed
Specifications: Size 10 x 9 x 0.5 in

2025 Table Calendars with Plantable Seeds

Introducing our 2025 Table Calendars: a blend of practicality and sustainability. Each of the 12 pages, plus the cover, is made from plantable seed paper embedded with marigold, basil, and wildflower seeds. Set in a stylish bamboo easel stand, this calendar not only keeps you organized but also lets you grow beautiful plants. Perfect for eco-conscious individuals who love a touch of nature in their everyday lives.

Features

1. Calendar Design and Layout

- **Monthly Pages:** Each tri-month features a unique design, incorporating the specific plants (marigold, basil, wildflowers) that can be grown from the seed paper. It's a clean, easy-to-read layout with ample space for notes.
- **Cover Page:** Design the cover to be visually appealing and informative. Highlight the eco-friendly and plantable aspects of the calendar.
- **Seed Paper Sheets:** Ensure each sheet has embedded seeds and is easy to tear off.

2. Seed Paper

- **Quality:** Choose high-quality, biodegradable paper that holds seeds well and allows for easy planting. The paper is thick enough to withstand handling but still plantable.
- **Instructions:** Provide clear planting instructions for each type of seed included and this information is imprinted on the front page.

3. Bamboo Easel Stand

- **Design:** The stand is sturdy and elegantly designed to complement the calendar. Bamboo is a great choice for sustainability and aesthetics.
- **Functionality:** The stand allows easy flipping of the calendar pages and provides good support for the calendar.

4. Packaging and Presentation

- **Eco-Friendly Packaging:** Recyclable and compostable carton box materials for packaging with one color imprint.
- **Presentation:** A sleek, minimal design for the packaging that reflects the eco-friendly nature of the product.

5. Additional Ideas

- **Educational Aspect:** Include fun facts about the plants featured and tips on how they can benefit the environment or home gardens.

This combination of a calendar and plantable seed paper is not only practical but also adds a meaningful, eco-friendly touch to everyday life.
