Printing Options:

For customization or branding, we recommend the following printing methods:

- **UV Printing:** UV inks provide bright and vivid colors that are long-lasting. These colors will not easily fade or wear off over time.
- **Screen Printing:** Once the screens are set up, screen printing is very efficient for mass production. It's a popular method for creating large quantities of custom wallets.
- **Debossing:** A timeless, professional option for imprinting your logo or custom design directly onto the leather.
- **Foil Stamping:** For a more premium feel, add a touch of metallic foil stamping for logos or text.
- **Laser Engraving:** This method offers precise and clean engraving for logos or initials, ideal for adding a personal touch.

Printing can be done on the exterior or interior of both the wallet and credit card holder, depending on your preference. Let us know your design requirements, and we'll ensure it's beautifully executed on your order!
