Photo Crystals

216-F
Photo Crystal
Specifications: Product Size: 100 x 200 mm

Personalized Crystals

The most popular creative crystals are photo crystals with a Pentagonal shape. They were made of transparent, glassy crystal. They are thus translucent and glossy. They are also strong and long-lasting. The dimensions of this pentagon crystal are 13 x 20 cm. They can be altered. They are therefore frequently used to store photos. Furthermore, they work well for practically any circumstance for printing 3D images. The crystal is more appealing because of its rectangular base. As a result, you can use these crystals to create custom crystals.

This crystal's design is quite understated yet graceful and exquisite. They can also be used as decorative accents. It offers the option of sublimation printing. As a result, you can personalize them with various images. They are the ideal creative crystals for business gatherings as well. They can be personalized with your logo and used in professional gatherings. They are excellent presents for your friends and family. These printed crystals can be personalized with special images. They are cheap products.
