

- It is Compact and portable and with integrated air-cooling system.
- Its Galvanometer can be rotated 90 degrees according to requirements.
- The spot quality of the laser marker is excellent the peak power is high, and the best marking effect can be achieved in the same material.
- Laser beam Stabilization: Laser stability, small loss, free from outside dust and mechanic impact, laser marking beam stability.
- Laser power: 30W
- Wavelength: 1064nm
- Beam Quality: $M2 < 0.05$
- Control Software : Ezcad
- Cutting depth: 1mm
- Ambient operating temp: 5°C - 10°C.
