Glass Bottles with Bamboo Lid and Eco Sleeve, 1 liter

TM-004-NAT
Glass Bottle with Bamboo Lid & Eco Sleeve
Specifications: Product Size: 19 x 130 mm, Capacity: 33oz - 1 liter

Glass Water Bottles with Bamboo-Lid & Eco-Sleeve

Clear glass water bottles with eco-sleeve and bamboo lid, Capacity: 33 oz (**1000 ml=1 liter**). Glass water bottles combine functionality, sustainability, and aesthetics, making them a popular choice for those looking to minimize their environmental impact while enjoying the benefits of clean, fresh-tasting water. Glass bottles with bamboo lids and eco-friendly sleeves combine several appealing features:

Material Composition:

- **Glass:** Made from high-quality borosilicate glass, known for its durability, resistance to thermal shock, and non-porous nature that ensures no leaching of chemicals into your beverage.
- **Bamboo Lid:** The lid is typically made from sustainable bamboo, which is eco-friendly, biodegradable, and adds a natural aesthetic to the bottle.

Eco-Friendly Sleeve:

- Many glass bottles come with a sleeve made from eco-friendly materials like silicone or recycled materials. This sleeve serves multiple purposes:
- **Protection:** It provides cushioning to protect the glass from bumps and drops, reducing the risk of breakage.
- **Grip:** Offers a comfortable, non-slip grip, making it easier to hold the bottle securely.
- **Insulation:** Helps to insulate the bottle, keeping drinks cooler or warmer for longer periods.
- **Personalization:** Some sleeves come in various colors or designs, allowing for customization and personal expression.

Design and Functionality:

- **Aesthetic Appeal:** The combination of glass, bamboo, and eco-friendly sleeves gives these bottles a stylish and modern appearance.
- **Practicality:** Typically designed with a wide mouth for easy filling and cleaning, and often dishwasher-safe for convenience.
- **Leak-Proof:** Bamboo lids often feature a silicone seal to prevent leaks and spills, making them suitable for carrying in bags or backpacks.

Environmental Benefits:

- Reusable and reduces the need for single-use plastic bottles, contributing to environmental sustainability efforts.
- Both glass and bamboo are recyclable and promote a reduced carbon footprint compared to plastic alternatives.

Versatility:

- Suitable for a variety of beverages, including water, juices, smoothies, and even hot drinks (depending on the specific bottle and lid design).
- Ideal for everyday use, outdoor activities, gym sessions, and travel.

Care and Maintenance:

- Glass bottles with bamboo lids and eco sleeves are generally easy to clean. The glass is dishwasher-safe, while the bamboo lid and eco sleeve can be hand-washed with mild soap and water.

Overall, glass bottles with bamboo lids and eco sleeves offer a blend of sustainability, functionality, and aesthetic appeal, making them a popular choice among environmentally-conscious consumers who prioritize style and practicality in their hydration choices.
