# CAD-CUT PU T-Shirt Transfer Vinyl - Metallic

In need of giving your logo presses a gorgeous, shiny look, Incredible metal effects, and finishes are created by HTV Metallic and may be applied to practically any kind of clothing. You can choose from a fantastic selection of various colors and tints that are offered. Metallic enables you to create durable, long-lasting metal effects that will always capture the appropriate attention, unlike conventional t-shirt vinyl or other HTV vinyl options. Our HTV Metallic film is a unique type of heat press vinyl. It will not only assist in giving any clothing a distinctive metallic effect, but it is also dye-resistant. Even while being stretched or shrunk to extremes, it can maintain its shape and form. The metallic appearance will not change from wash to wash. It's incredibly opaque as well. Cheap HTV vinyl purchased elsewhere may not necessarily come with that warranty. HTV Metallic is an excellent option for anyone who needs to press metal-effect logos, writing, or artwork onto t-shirts or other items. It is offered in 15 vivid colors. Because of the visual effects and durability, it's some of our favorite heat transfer vinyl. These heat-transfer vinyl sheets are not your typical ones!

## Best Value Material for Lightweight Garments

- Cuts & weeds easily
- Thin, flexible, & durable
- Semi-matte finish
- Not recommended for layered 2-color application

## Material Specifications

- Composition: Polyurethane (PU)
- Carrier: Frosted, Pressure-Sensitive
- Thickness: 100 microns/.10mm
- Stretch & Rebound: 3
- Washability: 50
- Safety: **CPSIA Certified**
- Laser cutter compatible

## Fabric Compatibility

- Cotton 100%
- Polyester 100%
- Preshrunk Cotton 100%
- Cotton/Poly Blends
- Lycra/Spandex Blends
- Nylon

## Benefits

- [Great for lightweight active garments](#)
- Cuts and weeds easily
- Thin, flexible, and durable

**Note:** For textured balls, remove the carrier and heat apply for an additional 8 seconds. SportFilm Lite is not recommended for two-color applications. If you're having issues with the film peeling up with the carrier when releasing, allow the design to cool a little longer. If you've already started to lift the edges, complete a repress.

# Care Instructions

- Machine wash inside-out using mild detergent.
- Do not use bleach. Dry at a normal dryer setting on household machines. Do not dry clean.

## Storage

Store in a cool and dry area of around 65 to 70 degrees Fahrenheit with 50% relative humidity. Keep away from direct heat, sunlight, and humidity. The recommended shelf life is one year.
