Magnet Accessories  
Specifications: See 16 mm diameter

# Round Button Magnets

Newly developed fasteners called button magnets are made of magnetic adhesive materials. In order to prevent your badge from leaving pores on the fabric, it is helpful. enables the card to be seen clearly. It features three 18 mm-wide magnetic strips that firmly draw the card toward itself.

Since they don't need any additional materials to hold your badge in the appropriate position, magnetic button badge holders are incredibly adaptable. It is simple to use a magnetic name badge holder since all you need to do is tuck the magnetic attachment underneath your garment to keep your ID card in place. Additionally, round magnets are powerful, round magnets that can be used in almost any industry. usage for a variety of things, including office whiteboards. includes everything from furniture to industrial holding applications that demand great magnetic strength. We offer button magnets in various permanent magnet materials, sizes, shapes, and magnetic pull strengths. Circular magnets known as button magnets are perfect for both industrial-strength applications as well as holding tasks requiring less force. They are excellent for optimizing your work process and for organizing and organizing it.
